EDUCATION

University of Washington Tacoma — B.A. Computer Science (Expected 2026)

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Design

TECHNICAL SKILLS

Languages: Java

Concepts: OOP, Data Structures, Algorithms, Recursion, Debugging, File I/O

Tools: IntelliJ & GitHub

Professional: Leadership, Team Collaboration, Communication, Adaptability

PROJECTS

Craps Game — Java (MVC Architecture)

- Designed and implemented a casino-style craps game using object-oriented principles and MVC design pattern.
- Structured separate Bank, Dice, and Player classes with encapsulation and clean logic separation.
- Developed JUnit tests to validate betting logic, edge cases, and rule accuracy.

Word Guessing Game — Java

- Loaded external file data into an ArrayList with randomized word selection.
- Used char arrays to track guesses, attempts, and prevent duplicate input.

EXPERIENCE

ICPC Regional Programming Competition — Team Participant | 2026

- Collaborated in a competitive 3-person team solving timed algorithmic programming problems.
- Applied efficient time and space complexity strategies under strict contest constraints.

Assistant Manager — 1915 KC House | SeaTac, WA | Mar 2019–Present

- Reduced nightly closing time by 60 minutes through workflow optimization.
- Trained and mentored 15+ employees, improving team performance and retention.
- Managed inventory, vendor coordination, scheduling, and daily operations.
- Strengthened team culture from reactive to collaborative, increasing morale and consistency.
